

# GRAV-AUDIO VIDEO SCHEDULAR SYSTEM

## Precision-Controlled Media Scheduling System

[www.grovesystems.co](http://www.grovesystems.co)

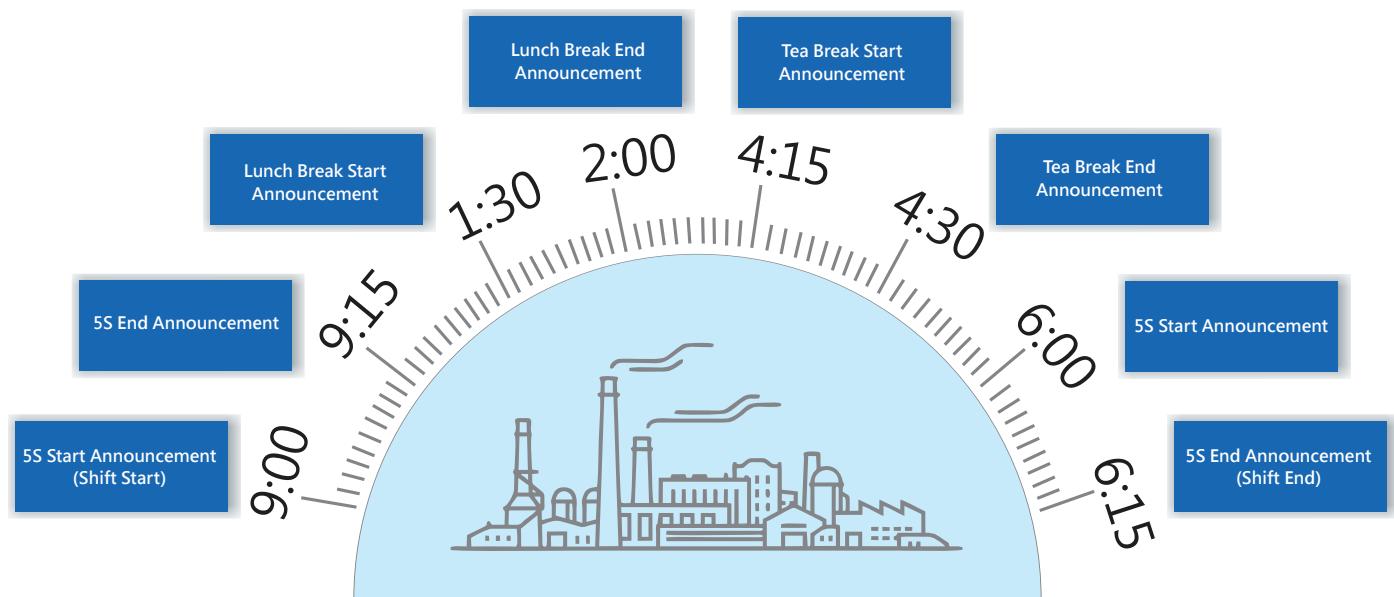

### Key Features

- Supports 1 Audio Zone (expandable to 2 Audio Zones on request) and 1 Video Zone.
- Daily, Weekly, Monthly, Annual scheduling options.
- Up to 250+ schedules per zone supported.
- Web and Android mobile app control interface.
- 1-Second Precision schedule creation and triggering.
- Automatic Time Sync via Wi-Fi or LAN.

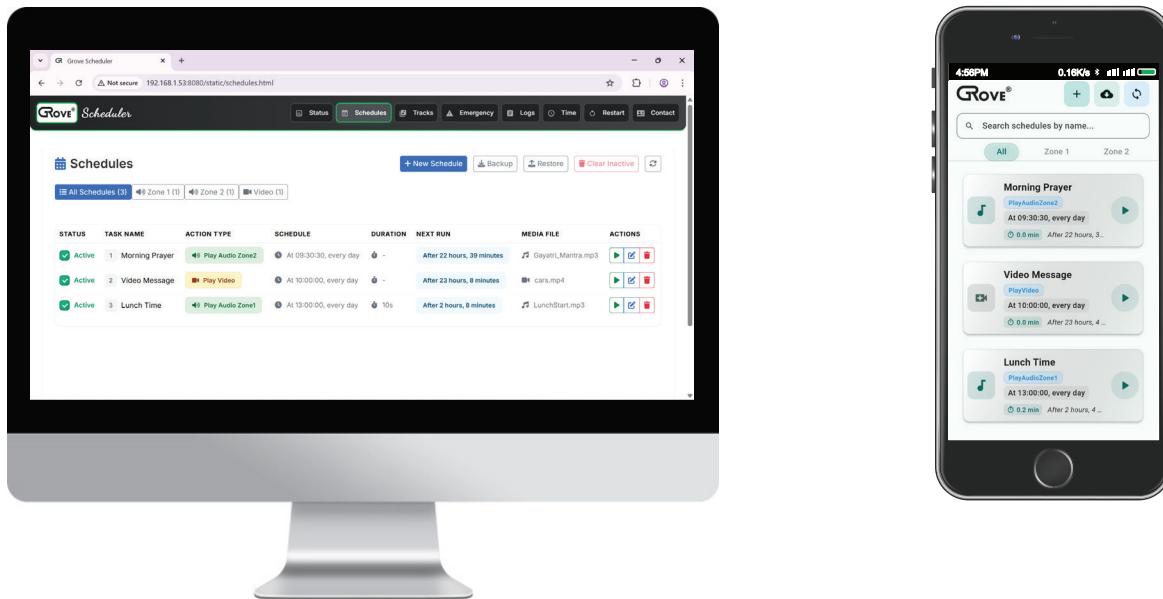

### Product Overview

The Grove AV Scheduler is a precision-controlled media scheduling system designed to manage independent audio playback zones and scheduled video playback. Featuring high time accuracy via NTP synchronization and RTC backup, it provides reliable media automation for schools, factories, retail spaces, and public areas. The system supports remote control through a web browser and mobile app for ease of management and real-time adjustments.

### Industrial / School Application

## Audio Specifications

## Technical Specifications

| Parameter              | Value  |
|------------------------|--|
| Audio Zones            | 1 (Expandable to 2, independently scheduled) |
| Audio DAC Interface    | Digital USB audio to 3.5mm                   |
| Audio Format           | MP3 (.mp3)                                   |
| Audio Playback Control | Schedule-based auto start/stop               |
| Video Output Interface | HDMI (Micro HDMI connector)                  |
| Video Format           | MP4 (.mp4)                                   |
| Video Playback Control | Schedule-based auto start/stop               |
| Time Sync              | Automatic time sync via Internet             |
| Time Accuracy (Online) | ±50 ms (typical)                             |
| Dimensions             | 41 cm x 14 cm x 7.5 cm (approx.)             |
